

## Ultimate sound experience from HEICO SPORTIV for the new Volvo V60

**With the newly developed quad tailpipe sport exhaust system for the V60 T6, Volvo Tuner HEICO SPORTIV offers the ultimate sound experience. The stainless steel system combines German engineering artistry with the best material quality and a perfect sound.**

Stricter noise regulations and downsizing engines lead to an increasingly less emotional driving experience in modern automobiles. A fact that confronts serious suppliers of tuning and accessory parts with new challenges.

For HEICO SPORTIV, legal use is always at the forefront. Like all other HEICO SPORTIV products, the new quad tailpipe sport exhaust system complies with the strict guidelines of the German Road Traffic Licensing Regulations (StVZO). It is supplied with an EC approval, which eliminates the need for registration.

The complete stainless steel system starts from the catalytic converter and is optionally available in a second version with electronic flap control. An optical and typical HEICO distinguishing feature are four oval stainless steel tailpipes in black chrome, which are mounted in conjunction with the standard rear skirt. The result of this engineering achievement is a sporty, powerful sound, which is further enhanced by pressing the e.motion® button.

Alternatively, the same design is also available as a quad tailpipe kit without rear silencer.

The HEICO SPORTIV quad tailpipe sport exhaust system for the new Volvo V60 T6 and the HEICO SPORTIV quad tailpipe kit for the V60 D3/D4/T5/T6 will be available from February 2019.
