

# Performance diagram & technical specification – temporary data\*\*

\*\* Temporary technical data: all data reflect the current state of the development

### Notes on the performance data

All of the stated performance data were calculated by HEICO SPORTIV using 2D data recording on an in-house dynamometer (MAHA LPS3000) for a vehicle licensed in Germany. In this way, HEICO SPORTIV is able to ensure the realistic comparability of the data with and without performance enhancement transparently.

### TECHNISCHE SPEZIFIKATION / TECHNICAL SPECIFICATION

	HEICO SPORTIV	SERIENWERTE
Max. Leistung / Max. Power	265KW / 360PS	228KW / 310PS
Max. Drehmoment / Max. Torque	480 Nm	400 Nm
0-100 km/h*	5,5	5,8
Elastizität / Elasticity 80-160 km/h*	9,5	12,1
Vmax*	250	250

- \* ermittelt mit 2D Datarecording
- \* recorded with 2D Datarecording
- \* Vmax abgeregelt
- \* Vmax limited

Differences between the power, acceleration and in-gear-acceleration values and the official values published by Volvo may be attributable to country-specific differences and / or different measurement conditions, or may depend on vehicle-specific data such as vehicle type, empty weight, wheel-tire combination or gearbox design. The intrinsic nature of our tests can result in deviations of +/- 5% from the factory specifications.

HEICO SPORTIV assumes no liability for a poorer performance of work engines.
